CCNP Enterprise Certification and Training Program

Introducing the new CCNP® Enterprise certification program

Software and networking become more and more interconnected every day. Technology advances are enabling new applications and businesses that connect everything—people, devices, machines, and applications. And with intent-based networking, organizations can take advantage of automation to scale and secure their networking infrastructure. To capitalize on these opportunities, today's networking professionals need a broader range of skills and deeper focus in strategic technology areas. The new CCNP Enterprise certification program gives you exactly that breadth and depth.

We designed the new CCNP Enterprise certification to help you prove your skills in the ever-changing landscape of enterprise network technologies. The certification covers core technologies and a focus area of your choice. You choose where you want to focus. You choose where to take your career.

Among the industry's most widely recognized and respected certifications, CCNP sets you apart. It tells the world you know what you are doing. In addition, completing a CCNP certification exam earns you a Cisco® specialist certification, so you get recognized for your accomplishments along the way.

Benefits

- **Show the world you know your stuff** with a high-value certification

- **Customize your certification** to your technical focus

- **Position yourself for advancement** in the fast-paced world of enterprise technologies

- **Add networking automation skills** to your areas of expertise

- **Earn a Specialist certification** for passing any CCNP exam – core or concentration

- **Qualify for the CCIE Enterprise lab exam** by passing the CCNP core exam

- **Link that CCNP certification badge** to all your social media profiles

New exams go live on February 24, 2020

If you have started working toward the current CCNP Routing and Switching, CCNP Wireless, or CCDP certifications, keep going. In the new program, you'll receive credit for work you've completed in these current certifications.

- If you pass any exams in these certifications before February 24, you'll receive badging for corresponding new exams and credit toward the new CCNP Enterprise certification

- If you complete any of these certifications before February 24, you'll receive the new CCNP Enterprise certification and badging for corresponding technologies—enterprise core technologies, advanced routing, wireless, or design

Earning your CCNP Enterprise certification

The new CCNP Enterprise certification program prepares you for today's professional-level job roles in networking technologies. One of the industry's most respected certifications, CCNP validates the core knowledge you need while providing the flexibility to choose a focus area.

To earn CCNP Collaboration, you pass two exams: a core exam and a concentration exam of your choice.

- The core exam, **Implementing and Operating Cisco Enterprise Network Core Technologies** (ENCOR 300-401) focuses on your knowledge of enterprise infrastructure including dual-stack (IPv4 and IPv6) architecture, virtualization, infrastructure, network assurance, security, and automation. You can prepare for this exam by taking the training course, **Implementing and Operating Cisco Enterprise Network Core Technologies** (ENCOR).
  - The core exam is also the qualifying exam for CCIE Enterprise certification. Passing this exam helps toward earning both of these certifications

- Concentration exams focus on emerging and industry-specific topics such as network design, SD-WAN, wireless, and automation. You can prepare for concentration exams by taking corresponding Cisco training courses. Choose your CCNP Enterprise concentration exam from these options:
  - **Implementing Cisco Enterprise Advanced Routing and Services** v1.0 (ENARSI 300-410)
  - **Implementing Cisco SD-WAN Solutions** (ENSDWI 300-415)
  - **Designing Cisco Enterprise Networks** (ENSLD 300-420)
  - **Designing Cisco Enterprise Wireless Networks** (ENWLSD 300-425)
  - **Implementing Cisco Enterprise Wireless Networks** (ENWLSI 300-430)
  - **Automating and Programming Cisco Enterprise Solutions** (ENAUTO 300-435)

The CCNP Enterprise certification and training program provides real-world, job-focused skills in key areas. CCNP Enterprise validates the knowledge you need to excel in your job.

Industry recognition and real-world know-how

CCNP certification sets you apart. So go ahead. Earn that CCNP Enterprise certification badge and post it on your social profiles.
