ICT develop and produce the most valuable range of qualifications for learners of IT and Telecom.

Over 20000 students trained in Two Decades.

Universities, employers, government, ministries and other organizations recognize us as valuable partner.

ICT Trainings Institute – Engineering Your Career

## SharePoint 2013 Server Advanced Solutions

### Course Guide

SharePoint introduces new ways to share your work and work with others, organize your projects and teams and discover people and information.

SharePoint training curriculum is designed to develop the skills necessary to design & develop organizational extended needs.

Microsoft®  
**SharePoint®**  
2013

### Microsoft is globally accepted exam

The Microsoft exams are trusted and accepted by leading employers, educational institutions and governments worldwide.

For a full list of organizations using these market-leading exams, go to [www.microsoft.com](http://www.microsoft.com)

# SharePoint Server Advanced Solutions

## Course Contents

### Module 1: Creating Robust and Efficient Apps for SharePoint

In this module, you will review key aspects of the apps for SharePoint development platform, including capabilities, packaging and infrastructure, client-side programming for SharePoint, and app security. You will also learn about how to optimize the performance of your apps.

#### Lessons

- Apps for SharePoint
- Communicating with SharePoint from an App
- Authenticating and Authorizing Apps for SharePoint
- Designing Apps for Performance

#### Lab: Monitoring SharePoint Health Scores

- Creating and Deploying an App Part
- Working with Server Health Scores

*After completing this module, participants will be able to:*

- Describe the apps for SharePoint development platform.
- Use the client-side object models and the REST API to communicate with SharePoint.
- Configure security for apps for SharePoint.
- Optimize the performance of apps for SharePoint.

### Module 2: Developing Managed Metadata Solutions

In this module you will see metadata objects and how they are used to categorize items so that you can learn how to work with them in code. You will also see how to use the advanced features of terms and manage permissions and roles. In this way you can provide a full set of terms that users can tag content with.

#### Lessons

- Managed Metadata
- Configuring Managed Metadata Term Sets
- Working with Managed Metadata Fields

#### Lab: Developing Managed Metadata Solutions (Part 2)

- Creating and Configuring the Corporate Structure App
- Displaying the Existing Taxonomy Groups
- Creating a Group, a Term Set, and Terms
- Obtaining the Host Web
- Adding Metadata Site Columns

#### Lab: Developing Managed Metadata Solutions (Part 1)

- Creating and Configuring the Corporate Structure App
- Displaying the Existing Taxonomy Groups

- Creating a Group, a Term Set, and Terms
- Obtaining the Host Web
- Adding Metadata Site Columns

*After completing this module, participants will be able to:*

- Explain the capabilities and applications of managed metadata in SharePoint 2013.
- Automate the creation and configuration of managed metadata term sets.
- Interact with managed metadata term sets and fields from client-side and server-side code.

### Module 3: Interacting with the Search Service

The module provides an overview of the search service architecture in SharePoint 2013 as it relates to developers, before describing how to construct queries using Keyword Query Language (KQL) and FAST Query Language (FQL) and submit these queries to the search service.

#### Lessons

- SharePoint 2013 Search Service
- Building Search Queries with KQL and FQL
- Executing Search Queries from Code

#### Lab: Executing Search Queries from SharePoint Apps

- Submitting Search Queries from Client-Side Code
- Using a Custom Action to Launch A Search App

*After completing this module, participants will be able to:*

- Describe the SharePoint Search Architecture
- Describe the structure of the search index
- Describe what a crawled property is and how they are created
- Describe what a managed property is and how they are created
- Describe the various settings of a managed property
- Modify the search schema at various levels

### Module 4: Customizing the Search Experience

In this module you will create and modify queries as well as manage search results.

#### Lessons

- Customizing Query Processing
- Customizing Search Results
- Configuring Result Types and Display Templates
- Customizing Content Processing

#### Lab: Configuring Entity Extraction

- Create and deploy an entity extractor.

*After completing this module, participants will be able to:*

- Create various types of result sources
- Create basic and complex query transforms

- Configure query rule conditions and actions to target query intent
- Create and modify result types
- Create and modify display templates
- Utilize display templates with various search web parts
- Add managed properties as refiners with counts
- Utilize entity extraction in your crawls
- Extend content processing with Content Enrichment

### Module 5: Implementing Enterprise Content Management

In this module, you will work with SharePoint document management features in code.

#### Lessons

- Working with eDiscovery
- Working with Content Management
- Automating Records Management

#### Lab: Implementing Content Management Functionality

- Creating a Custom Document ID Provider
- Registering a Custom Document ID Provider
- Applying a Custom Audit Policy

*After completing this module, participants will be able to:*

- Use SharePoint eDiscovery functionality in custom applications.
- Create and manage information management policies and document sets programmatically.
- Manage and customize SharePoint records management functionality.

### Module 6: Developing a Publishing Site for Web Content

In this module, you will learn how to utilize develop web content solutions for publishing sites.

#### Lessons

- Programming with the Web Content Publishing API
- Developing Page Components for Web Content Publishing

#### Lab: Customizing a SharePoint Publishing Site

- Building a Custom Page Field Control
- Building a Page Layout

*After completing this module, participants will be able to:*

- Describe the capabilities of the Publishing API.
- Describe how to access the Publishing API utilizing the server-side object model.

## Module 7: Structuring and Publishing Websites for All Users

This module will focus on providing you with the knowledge to build web sites that are mobile device friendly, support multiple languages and with proper navigation. This will be accomplished by introducing you to SharePoint features including device channels, managed navigation and variations.

### Lessons

- Website Structure and Navigation
- Publishing Content
- Publishing to Mobile Devices
- Multi-language sites using Variations

### Lab: Publishing for Multiple Devices and Languages

- Creating a Navigation Term Set
- Creating a Device Channel
- Using the Device Panel Control
- Creating a French Variation

### Lab: Structuring a SharePoint Publishing Site

- Creating a Navigation Term Set
- Creating a Device Channel
- Using the Device Panel Control
- Creating a French Variation

### After completing this module, participants will be able to:

- Configure website structure and navigation
- Describe the difference between structured and metadata navigation
- Programmatically configure site navigation
- Utilize basic publishing features of SharePoint
- Use the new cross-site publishing features of SharePoint 2013
- Work with mobile devices using Device Channels
- Configure and implement variations for multilingual sites
- Work with human and machine translation tasks in variation sites

## Module 8: Developing Optimized Internet Sites

In this module, you will learn how to optimize your site for Internet search engines, and maximize the performance of rendering your site content.

### Lessons

- Optimizing a SharePoint Site for Search Engines
- Optimizing Performance and Scalability

### Lab: Optimizing SharePoint Publishing Sites

- Optimizing a Site for Search Engines
- Maximizing the Performance of a Publishing Site

### After completing this module, participants will be able to:

- Configure search engine optimization settings
- Add SEO Properties to publishing pages and Managed Navigation terms
- Configure caching to improve site rendering performance
- Optimize site assets and resources to maximize performance

## Module 9: Working with Business Connectivity Services

In this module, you will learn how to develop Business Connectivity Services (BCS) solutions.

### Lessons

- Business Connectivity Services in SharePoint 2013
- Creating BDC Models in SharePoint Designer
- Creating BDC Models in Visual Studio 2012

### Lab: Working with Business Connectivity Services

- Creating Farm-Scoped External Content Types
- Creating App-Scoped External Content Types

### After completing this module, participants will be able to:

- Describe the key components of Business Connectivity Services in SharePoint Server 2013.
- Create and configure BDC models by using SharePoint Designer.
- Create and configure BDC models by using Visual Studio 2012.

## Module 10: Creating Advanced Business Data Connectivity Models

This module will explore how to create custom search connectors using several different methodologies and lastly, you will learn the advanced topic of the new SharePoint 2013 external event notification feature to support SharePoint list features such as alerts and event receivers when external data changes.

### Lessons

- Configuring BDC Models for Search
- Developing Custom Connectivity Components
- Working with External Events and Notifications

### Lab: Creating and Deploying a .NET Connectivity Assembly

- Create a .NET Connectivity Assembly
- Implementing Entity Methods
- Deploying and testing a .NET Connectivity Model

### After completing this module, participants will be able to:

- Decide when to use BDC models to extend search
- Describe the BCS Connector Framework

- Describe and implement BDC search stereotyped operations
- Configure BDC model properties for search
- Configure custom item level security
- Utilize techniques to optimize search indexing

## Module 11: Working with Business Data

In Client Applications BCS provides a framework to access via a wide array of protocols such as WCF and OData services to a myriad of external data sources, ranging from data stored in databases to custom proprietary data stores. In this module you will work with Business Data in both custom and composite solutions.

### Lessons

- Working with Business Data in Composite Solutions
- Working with Business Data in Custom Solutions
- Working with Business Data in Client Applications

### Lab: Working with Business Data in Apps for SharePoint

- Reading Business Data in Client-Side Code
- Presenting Business Data in an App for SharePoint

### After completing this module, participants will be able to:

- Access business data by using composite solutions.
- Utilize the Business Data Web Parts on your Team and Publishing pages
- Work with external data columns in lists
- Work with Business Data in SharePoint workflows
- Access business data by using custom solutions.
- Utilize the various APIs available such as CSOM, JSOM, and REST
- Access business data by using client applications.
- Configure external content types for use with Office clients

## Module 12: Managing and Accessing User Profile Data

In this module, you will review key aspects of the user profile service, and see how you can write client-side and server-side code to access, update and manage user profile properties.

### Lessons

- User Profile Data in SharePoint 2013
- Options for Accessing User Profile Data
- Managing User Profile Data
- Managing User Profile Properties

### Lab: Accessing User Profile Data

- Add People Search Functionality to an App
- Display User Properties in the App
- Add Code to Display User Profile Properties
- Add Code to Manage User Profile Properties

### *Lab: Managing User Profile Properties*

- Add People Search Functionality to an App
- Display User Properties in the App
- Add Code to Display User Profile Properties
- Add Code to Manage User Profile Properties

*After completing this module, participants will be able to:*

- Explain how user profile data is used in SharePoint.
- Describe the options and restrictions for accessing user profile data.
- Use client-side code to access and server-side code to access and update user profile data.
- Configure and manage user profile properties.

### **Module 13: Developing Microsoft SharePoint Server 2013 Advanced Solutions**

In this module, you will see some of the social features in SharePoint 2013, and you will see how you can develop apps which extend and customize the social workload; tailoring the experience for your business needs.

#### *Lessons*

- Overview of the Social Workload
- Developing Social Solutions
- Working with Feeds

### *Lab: Creating a Social App Part*

- Displaying a Project Site Newsfeed
- Posting a Message to a Newsfeed
- Using Search to Retrieve Newsfeed Posts

*After completing this module, participants will be able to:*

- Describe the main components of the social workload.
- Develop solutions to extend the social workload.
- Create solutions which make use of the newsfeed functionality in SharePoint Server 2013.

### **Module 14: Monitoring and Troubleshooting Custom SharePoint Solutions**

This module will introduce methods that you can use to improve the performance and scalability of solutions and apps.

#### *Lessons*

- Debugging SharePoint Apps in Visual Studio
- Diagnosing Faults in Deployed Apps
- Testing Performance and Scalability

### *Lab: Enabling ASP.NET Tracing*

- Adding a Diagnostics Page to a SharePoint App
- Configuring ASP.NET Tracing
- Using Trace Logs

*After completing this module, participants will be able to:*

- Describe how to identify, diagnose, and remove bugs in SharePoint apps during development.
- Describe how to record information about issues that arise in deployed SharePoint apps.
- Describe how developers optimize the performance of SharePoint apps by implementing best practices, measuring performance, and load testing.
